COMPANY BACKGROUND

NuPrime Audio is a high-end audio company founded in 2014 by a team of experienced engineers committed to advancing amplifier technology and digital audio performance. Building on a legacy of innovation in Class D amplification and proprietary technologies. The company was established following the acquisition of NuForce's high-end audio assets. Its vision has been shaped by founder Jason Lim, whose background in CPU design, enterprise software, and experience in the audio industry played a key role in defining NuPrime's direction.

NuPrime quickly established itself within the industry, earning four Product of the Year awards in 2015 from The Absolute Sound and SoundStage! Network. Since then, the company has continued to receive recognition from leading audio publications worldwide, reinforcing its reputation for delivering high-performance audio solutions and innovative engineering.

Industry Recognition

Our products are highly rated by industry experts and publications such as:

The Absolute Sound (USA)

NuPrime **IDA-8, DAC-9, STA-9, IDA-16, AMG One, AMG PRA, AMG STA, Evolution One, DAC-10H, ST-10,** and **Evolution STA** have received The **Absolute Sound Editors' Choice awards** consistently from 2016 to 2024.

Headfonics (USA)

NuPrime **CDP-9** received the **Writers' Choice** award from Headfonics in 2018.

HiVi Winter 2024 (Japan)

NuPrime **DAC-9X, AMG PRA, AMG STA,** and **STA-9X** have been selected as **Best Buy Products**.

HiFi Class (Poland)

NuPrime **IA-9X** has been highly praised for its neutrality, musicality, and performance versatility with different speaker setups.

HIFI-IFAS (Germany)

NuPrime **STA-9X** and **DAC-9X** have been highly recommended by **HIFI-IFAs**.

HiFi-Advice (Netherlands)

HiFi Advice has reviewed the NuPrime **AMG STA, ST-10/10M, Evolution STA, Evolution One,** and **AMG PRA,** awarding them high praises and accolades.

Stereo January 2024 (Japan)

NuPrime **DAC-9X,** and **STA-9X** have been selected as **Best Buy Components**.

QOBUZ (France)

The NuPrime **STA-9** has received an **Qobuzissime award**.

ON-mag.fr (France)

The NuPrime **Omnia A300** received high ratings from **On-mag.fr**.

Goldenes OHR Awards (Germany)

Both NuPrime **DAC-9** and **IDA-8** have received an **Goldenes OHR Awards** in 2019.

WHY CHOOSE NUPRIME AUDIO AND HOW TO CHOOSE NUPRIME PRODUCT

Surpassing Expectations. Redefining Perfection.
Where Engineering Excellence Meets the Emotion of Music.

NuPrime Audio merges cutting-edge engineering with the warmth of analog sound. As a global leader in hybrid Class-D amplifier design, we deliver reference-level performance that rivals the world's finest solid-state amplifiers. Every NuPrime product reflects our mission to make true high-end audio accessible without compromise.

RIVALING THE VERY BEST CLASS A AMP

"Between the CH A1.5 and the [NuPrime Evolution STA](#), certain key aspects have certainly noticeably shifted, but on the surface of it, and in an absolute sense, there is not very much to indicate that we just switched from a \$31,000 USD amplifier to one costing only \$5,000 USD. Honestly, it was more like switching from one high-end amplifier to another, invoking differences catering more to taste than to absolute quality."

- by Christiaan Punter, HiFi-Advice

"The [AMG STA-SE](#) is a different animal. Given its ballsy and confident yet liquid presentation, it's perhaps more like Class A than Class A/B. More specifically, no longer Jeff Rowland-esque, in some ways, it now sounds more like a Pass Labs amplifier." - by Christiaan Punter, HiFi-Advice

[AMG One](#) review by by Dick Olsher from The Absolute Sound:

"The AMG One is currently not only my favorite Class D amp but also one of my favorite solid-state amps. Retailing at \$2900 per pair, I find it to be competitive at even a \$10k price point. Plenty of power and Class A-like finesse in an affordable package make for a no-brainer recommendation."

HOW TO CHOOSE

When purchasing an audio system, it is essential that you select one based on your individual preferences. For instance, a higher-priced model does not necessarily mean providing a better listening experience. All high-end audio products are not created equal, so be sure to choose the best one for your needs. The performance gap between different grades of high-end audio is narrowing annually due to new advancements in audio technology.

Discerning audiophiles who prefer the flexibility of separate components will appreciate the extensive range offered by NuPrime's Evolution, AMG, and 9 Series. Furthermore, NuPrime's integrated amplifiers and streaming companions provide a convenient and high-quality solution for those seeking a streamlined audio setup.

NuPrime Evolution Series

NuPrime top of the line series elevate your audio experience, ensuring you hear and feel more of everything.

NuPrime AMG Series

The AMG series delivers natural, detailed sound with an expansive stage. The AMG PRA has two gains and “warmth and impact” EQ settings. The AMG One and AMG STA-SE offers different sound characteristics catering to audiophiles’ music preferences. Therefore, the NuPrime mid-range series is designed for enthusiasts seeking optimization.

NuPrime 9X Series

Our most accessible range, has garnered a cult following among NuPrime fans, who affectionately refer to it as the ‘giant killer’ – a testament to its remarkable ability to punch above its weight and outperform expectations.

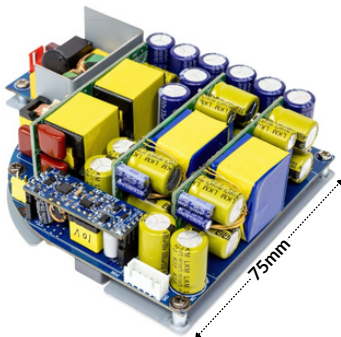

NuPrime Integrated Amps: IDA-9 and IA-9XG

Surpassing expectations, redefining perfection.

Raising the bar for high-end integrated amplifiers.

Within our acclaimed 9 Series, the IDA-9 and IA-9XG, represent the pinnacle of compact, high-performance audio design.

IDA-9: The Ultimate Hybrid Powerhouse Building on the multi-award-winning legacy of the IDA-8, the IDA-9 raises the bar for all high-end integrated amplifiers by doubling its predecessor's output power while maintaining the same compact elegance. It utilizes our revolutionary Ultra-Linear Class A Module (ULCAM), which perfectly marries the warm, audiophile-quality sound characteristics of Class A amplification with the dynamics, speed, and efficiency of a high-performance 600 kHz Class D switching stage. Delivering a staggering 200 watts per channel (at 8 Ohms), the IDA-9 produces a sound that is effortlessly dynamic, neutral, and rich in detail

Ultra Low Noise GaN Power with Active Noise Cancellation

Class A Transistors + Class D Power Stage

RMS Power output: 200W x 2 @ 8 Ohms
250W x 2 @ 4 Ohms
DAC: USB PCM 384 & DSD256

IA-9XG: The Customizable Analog Masterpiece designed to excel in analog audio setups. The IA-9XG is the world's most compact and powerful integrated amplifier, offering unprecedented control over your listening experience. A unique toggle switch allows listeners to seamlessly shift between two distinct sonic profiles: the Only Distortion Cancellation (ODC) circuit for highly dynamic, neutral studio monitoring, or the Harmonic Generation circuit, which utilizes Class A transistors to deliver a rich, warm sound reminiscent of a classic vacuum tube amplifier. Vinyl enthusiasts will also appreciate the built-in MM phono stage, featuring adjustable input capacitance and impedance for optimal cartridge matching.

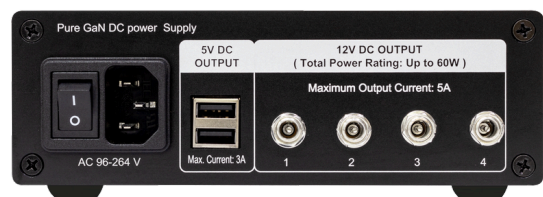

NuPrime Streaming Series

NuPrime Audio's streaming products include music servers and streamers supporting major streaming services, DLNA, AirPlay 2, Google Cast, and high-resolution audio. With low-noise power supplies, sampling rate converters, and external DAC compatibility, they deliver pristine sound quality and seamless integration into multi-room or HiFi systems, all easily controlled via dedicated apps.

NuPrime Power Series

NuPrime's Power Series delivers ultra-low-noise power for HiFi systems, combining advanced engineering with the warmth of analog sound to enhance soundstage, detail, and resolution. The Pure AC-6 power conditioner reduces AC noise by over 20dB using dedicated fifth-order LC filter circuits optimized separately for high- and low-power devices, ensuring superior isolation and cleaner power delivery. Complementing the lineup is the SiGa Power75, a next-generation high-efficiency AC-to-DC adapter that provides ultra-stable 12V and 5V output. Built on an advanced Silicon Carbide (SiC) and Gallium Nitride (GaN) hybrid architecture, and enhanced with CM-ANC noise cancellation and RF shielding, the SiGa Power75 creates a cleaner, faster power foundation for sensitive digital and audio components. Designed for discerning audiophiles, the Power Series delivers rock-solid stability and pristine power for exceptional sound performance.

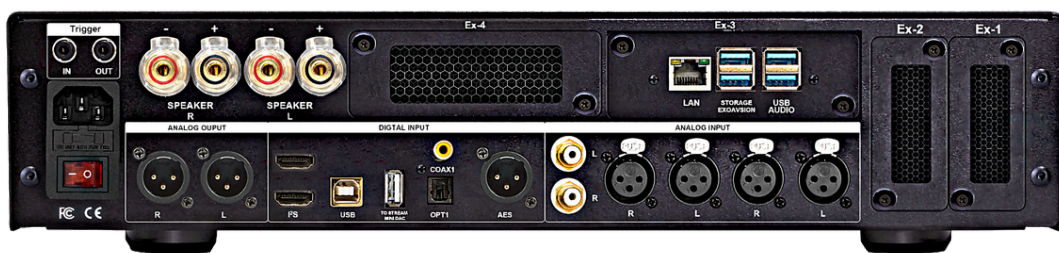

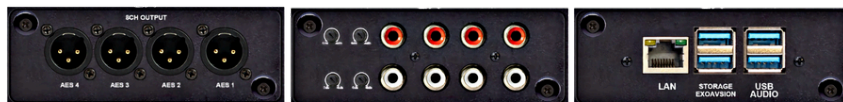

NuPrime IDA Fusion 10

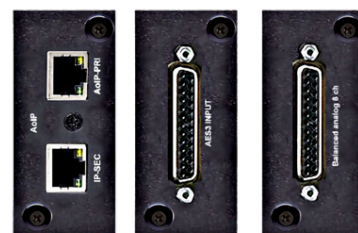

Built on NuPrime's advanced Fusion-X platform, the IDA Fusion 10 is a high-performance stereo integrated amplifier featuring a dual premium DAC architecture and an enhanced amplifier stage derived from the acclaimed AMG STA-SE. It delivers the signature AMG sonic character—natural, refined, and richly detailed—while offering greater dynamic range, authority, and control. Engineered for uncompromising two-channel music reproduction, the IDA Fusion 10 can also expand seamlessly into a full multi-channel immersive audio system through AoIP or an optional multi-channel USB plugin card.

WHAT IS NUPRIME-X?

NuPrime-X is leading the future of immersive and networked audio with the Fusion-X platform — a next-generation, multi-channel architecture designed for ultimate flexibility, scalability, and sonic precision. At its core, Fusion-X leverages AoIP (Audio over IP) and AES3 as the open standard integration protocol, ensuring seamless interoperability across a wide range of devices and systems. Fusion-X supports Dolby Atmos and advanced spatial audio formats, alongside high-resolution WiFi streaming, and a full suite of modular digital and analog I/Os. Compliant with professional standards including AES/EBU (AES3), AES67, USB Audio, and HDMI, NuPrime-X Fusion-X delivers breathtaking immersive sound for professional studios, theaters, e-sports and premium residential applications.

An Adaptable Multi-Channel Audio Ecosystem

Movies and games have long delivered multi-channel audio, and now platforms like Apple Music, Tidal, QQ, Qobuz, and YouTube are following suit with support for Dolby Atmos, DTS, and multi-channel PCM formats. Modern homes blend stereo systems, streamers, gaming consoles, and home theaters — all providing multi-channel audio through USB and HDMI.

The NuPrime Fusion-X platform unites these worlds in one modular, flexible, and scalable ecosystem — redefining how you experience music and movies.

Mac Mini Windows PC Music Server

USB audio delivering multi-channel PCM

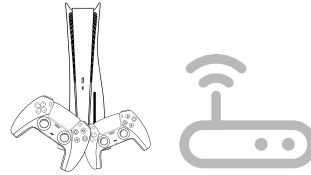

PS5, TV, Set-Top-Box, Apple TV, etc

HDMI Outputs: Dolby & DTS

AV Processor Redefined

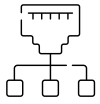

Core Component: Compact AV Processor with AES, AoIP and XLR (analog) outputs

Network AoIP

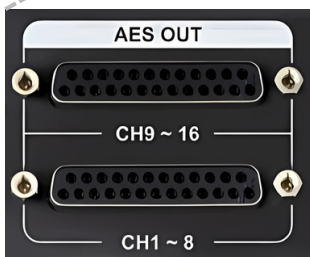

AoIP (Audio over IP) supports large multi-zone, reliable and low latency network audio

Optional AoIP plugin card

H16-AVP- A full-featured AV Processor with room acoustic calibration with digital (AES3) and analog (XLR) outputs

- HDMI 2.0 with HDCP 2.2., 3D and 4K HD video
- Dolby Atmos (up to 7.1.4), Dolby True HD, DTS:X, DTS-HD
- HDMI eARC

H16-AIP

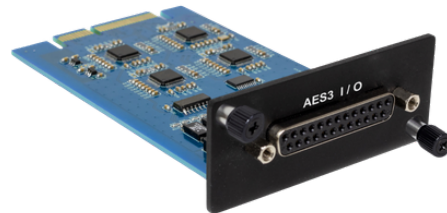

H16-AES

Fusion Series

Fusion 8D

The Fusion 8D delivers uncompromised immersive audio with four clock-synchronized high-end DACs, decoding each channel independently for ultra-low noise, superior dynamics, and exceptional detail. Unlike traditional AV receivers that rely on a single multi-channel DAC, Fusion 8D preserves full resolution and realism for music, movies, and gaming. With five Fusion-X expansion slots supporting AES67 (AoIP), AES/EBU (AES3) inputs, balanced XLR outputs, and other modular I/Os, the Fusion 8D offers flexible, future-ready connectivity for high-end audio systems.

Expandable plug-in modules for multi-channel digital and analog inputs and outputs.

Fusion-3X

Fusion-4X

The Fusion series amplifiers provide audiophiles with the intricate fidelity of stereo music paired with the explosive power and speed essential for cinematic experiences.

The Fusion 3X and 4X power amplifiers deliver exceptional performance for both refined stereo listening and the explosive dynamics of blockbuster films—without requiring separate systems or compromise. Rated at 200W into 8Ω and 400W into 4Ω, they can effortlessly drive speakers with impedances down to 3 ohms, while remaining stable during brief dips to 2 ohms.
